COOLING AND DISPENSING SYSTEMS

# MODEL CWP 300 GREEN LINE

COOLING OUTPUT OF UP TO 200 L/HOUR

*CWP GREEN LINE undercounter coolers series are professional devices which stand out from conventional water based coolers not only by their design and manufacturing quality, but also by their ease of installation and high output at small size.*

*The series includes solutions for fixed installation (under the counter), represented by models CWP 100/ 200/ 300; these are designed primarily for cooling beverages in kegs.*

## | CWP GREEN LINE

*The design of coolers from the CWP series is a complete INNOVATION in the class of undercounter coolers. The beverage is properly and evenly cooled thanks to an innovative direct cooling technology.*

## ADVANTAGES AND FUNCTIONAL CHARACTERISTICS OF THE CWP LINDR LINE:

**CWP (Contact Water Power)** – unique construction of the thermal block that combines the advantages of contact cooler and water based cooler in one. The evaporator is in direct contact with the beverage tubing and is able to respond immediately to increase beverage dispensing rate. The time needed to cool the beverage is only 30-40 minutes from turning the device on.

**GREEN LINE – LINDR GREEN LINE** technology is environmentally friendly thanks to the use of eco-friendly refrigerant R-290. We have introduced an energy saving system in the production. Thanks to this design, each product achieves **20% higher energy efficiency and 20% lower energy consumption.**

**LINDR COOLING TECHNOLOGY** – always more powerful than its electric input power.

**CONSTRUCTION AND SERVICING** – the modern arrangement of LINDR cooling technology ensures ease of access for potential servicing and maintenance.

**PERFORMANCE, QUALITY, SIZE** – the best performance/ quality/ size ratio.

✓ **IMPROVED PERFORMANCE** – MODEL CWP 300 GREEN LINE – Undercounter cooler CWP 300 is a professional device which stands out from conventional water based coolers not only by their design and manufacturing quality, but also by their ease of installation and high output at small size. The model is designed for cooling up to 8 beverages in kegs. It is the most powerful cooler in the CWP series.

✓ **COMFORTABLY PORTABLE** – easy and safe handling thanks to two handles on the top of the device.

✓ **GREEN LINE** – all models from the CWP series are fully in GREEN LINE design.

✓ **DESIGN** – CWP – Contact Water Power – using direct cooling technology in combination with elegant appearance and small size.

✓ **EQUIPMENT** – includes a thermostat allowing smooth and precise temperature regulation, cooling coil and speedfit fittings.

# TECHNICAL PARAMETERS

## AVAILABLE CUSTOM MODIFICATION OPTIONS

### POWER CABLE PLUG

Note  
Selected models are also available in 115 V/60 Hz or 220 V/60 Hz voltage.  
Other custom modifications are also available (contact us).
